

Key Points for Your Comments to FERC

Please customize your comments, but here are some key points:

Dear FERC Chairman and Commissioners,

- I request that you terminate the license for the Enloe Hydroelectric Project and deny the request for stay.
- As a ratepayer of Okanogan PUD granting a stay and allowing the PUD to retain their license will cause substantial harm and is not in the public interest.
- Given new evidence regarding fish passage [include any personal knowledge you have—i.e. if you have personally witnessed fish jumping at the spillway or swimming in the plunge pool] to the base of Enloe Dam and uncertainty regarding the design of the project [include anything you have heard in PUD meetings] the Commission should deny this request for stay and terminate the license .
- The PUD has not proceeded with the project development in a diligent manner [include why in your own words].
- The inability of the PUD to commence construction is entirely due to its own inaction and inability to develop a plan to design, construct, and operate the project [include why in your own words].
